Doath of Mr. John T. Cox.

It is with sincere regret that we chronicle the death of Mr. John Taylor Cox, which occurred at his home on Chauga creek, about five miles from Westmiuster, on Tuesday afternoon. He was about fifty years of age, and leaves a wife and six children to mourn his death. He had been a sufferer from dropsy for some time, but the immediate cause of his death was a severe attack of the grip. His remains will be laid to rest at Holly Springs to-day. Mr. Cox was a well-to-do farmer and an exemplary citizen. His death is a distinct loss to Oconee. We death is a distinct loss to Oconee. "Technically Sampson commanded the fleet, and Schley, as usual, the western division. The actual fact is, that after the battle was joined not a helm was shifted, not a gun was fired, not a pound of steam was put on in the engine room aboard any ship actively engaged in obedience to the order of either Sampson or Schley, save on their own two vessels. It was a captain's fight." Sampson was hardly more than technically in the fight. His only claim for credit rests upon his work as commander in chief in planning to meet the Spanish ships when they should come out.

Schley is entitled, as is Captian Cook, to the credit for what the Brooklyn did in the fight. On the whole, the President finds that the Brooklyn did well, though he considers the vessel's "loop" the "one grave mistake" made by any American ship during the battle. American ship during the battle.

Cheap Ration for Horses and Mules.

Farmers from various sections of the State have been writing asking about the advisability of feeding horses and mules on cotton seed meal and hulls and also asking for a cheaper ration than corn.

The following prices are given in a letter from Scrantou, S. There are a number of our farmers who are still unsettled in business on some of the water courses last year. Corn is worth about a dollar per bushel. They claim they cannot buy corn to feed mules on to raise 6 and 7-cent cotton. We know quite a number of landlords who have rented their lands out and have gone to cotton mills, and a great, many renters who were broken up last year by standing rent or giving one-third of their cotton for rent. This cripples them for farming and they are forced to the cotton mills. There are quite a number of farms, and listead pay about one-fourth of the products raised on the farms, take good care of our farms, keep up terraces and other things that are necessary, then there would be no necessity for either the landlord or tenant going to a cotton mill.

and many local names.

The symptons are readily recognized by any one who has seen cattle suffering from this fever. At first the animals become stupid and leave the herd for some secluded and shady part of the pasture. They appear listless and droop, as if all energy had forsaken them, the ears drop, the nose is more or less dry, rumination (chewing end) suspended, the urine light to dark red in color, and constipation marked, only small quantities of very dark, dry dung being voided. They are highly fevered, the temperature running from 103 to 107 degrees F. In milk cows the flow of milk is almost suspended.
